

Telecab17

**Innovative
through-the-floor
accessibility lift**

**Up to 845 lb capacity
to accommodate
mobility equipment**

**No hoistway
construction required**

Savaria® Telecab Home Lift

THROUGH-THE-FLOOR LIFT

The Savaria Telecab was built on the same technology as the company's popular V-1504 wheelchair platform lift and features a robust and reliable hydraulic drive system enclosed in a tower eliminating the need for a separate machine room. The enclosed cab with acrylic panels provides an elevator feel to this accessibility lift.

The Telecab is offered in two design styles and both include a non-skid platform with low threshold and gentle slope for easy wheelchair access. The platform is offered to a size of 36" by 54" for larger equipment access and the constant pressure operation features easy-to-use buttons including emergency stop. Emergency battery lowering and full safety sensor system to detect obstructions are included.
